

# AT9000 Advanced Transmitter

## Remote-sealed type of Differential Pressure Transmitters

### OVERVIEW

AT9000 Advanced Transmitter is a microprocessor-based smart transmitter that features high performance and excellent stability. Capable of measuring gas, liquid, and vapor, and liquid levels, it transmits 4 to 20 mA DC analog and digital signals according to the measured differential pressure.

It can also execute two-way communications between the communicator, thus facilitating self-diagnosis, range resetting, and automatic zero/span adjustment.

SFN, HART® and FOUNDATION Fieldbus are available.

\* Refer to SS2-GTX00Z-0100 for FOUNDATION Fieldbus type for the items marked with [★].

### FEATURES

#### Excellent stability and high performance

- Long-term stability is proven in 500,000 installations worldwide.
- Unique characterization and composite semiconductor sensors realize excellent temperature and static pressure characteristics.

#### A diverse lineup

- A diverse flange lineup, ranging from 1/2 inch (15 mm) to 4 inches (100mm), is available to meet user requirements.
- A wide range of models, including those for general purposes, high-temperature, and high temperature and high-vacuum service, is available to meet user requirements. In addition, the working temperature range of regular type has been expanded to 180 °C maximum to allow you greater freedom instrumentation.
- A wide variety of corrosion-resistant materials for wetted parts is also available.

#### Function to correct the temperature of the fill fluid of the capillary section

Changes in the density of the fill fluid caused by temperature fluctuations are calculated, and the output is corrected accordingly. This function substantially reduces (to 1/5 - 1/10) the effect of seasonal fluctuations in temperature.

#### Remote communication

- Two-way communication using digital output facilitates self-diagnosis, range resetting, automatic zero adjustment, and other operations.

#### China RoHS

This device is used in the Oil & Gas, Petrochemical, Chemical, Pulp & Paper, Food & Beverage, Machinery, Steel/Metal & Mining, and Automobile industries and therefore does not fall under the China RoHS Legislation.

If this device is used in semiconductor manufacturing equipment, labeling on the device and documents for the China RoHS may be required. If such documents are required, consult an Azbil Corp. representative.

HART® is a registered trademark of the FieldComm Group.

FOUNDATION™ is a trademark of the FieldComm Group.

## PRODUCT APPROVALS [★]

### FM Explosionproof for Division System/ Flameproof for Zone System (Code F1)

Explosionproof for Class I, Division 1, Groups A, B, C and D; Class I, Zone 1, AEx d IIC

Dust-Ignitionproof for Class II, III, Division 1, Groups E, F and G

T5 -40 °C≤T<sub>amb</sub>≤+85 °C

Hazardous locations

Indoor/Outdoor Type 4X, IP67

Factory sealed, conduit seal not required for Division applications

Caution - Use supply wires suitable for 5 °C above surrounding ambient

### FM Intrinsic Safety (Code F2)

IS/I, II, III/1/ABCDEFG/T4; -40 °C≤T<sub>amb</sub>≤+60 °C;

**Power Supply [★]**

12.5 to 42 V DC

Limited to 12.5 to 30 V DC for intrinsic safety, Type n, Non-incendive types

**Power Supply voltage and load resistance characteristics [★]**

See Figure 4.

Limited to Load resistance: 250 to 1345 Ω for SFN or DE communication. 250 to 600 Ω for HART communication.  
Power supply voltage: 12.5 to 30 V DC for intrinsic safety, Type n, Nonincendive types

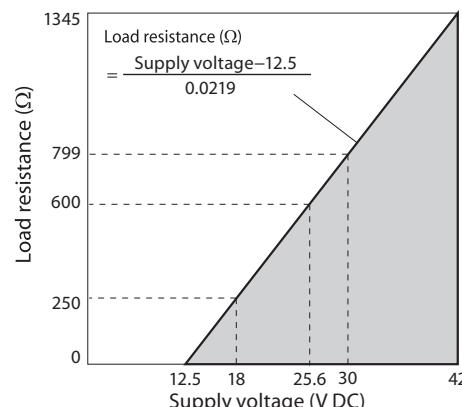

Figure 4. Supply voltage vs. load resistance characteristics

Note) For communication with a communicator, a load resistance of 250 Ω or more is necessary.

**Output [★]**

Analog output (4 to 20 mA DC) with DE protocol  
 Analog output (4 to 20 mA DC) with HART protocol  
 Digital output (DE protocol)

**Output signal [★]**

3.6 to 21.6 mA  
 3.8 to 20.5 mA (NAMUR NE43 compliant)

**Failure Alarm [★]**

Upper: 21.6 mA or more  
 Lower: 3.6 mA or less

**Table 1. Ambient temperature limits/Temperature ranges of wetted parts: Flange size: 4 inches (100 mm), 3 inches (80 mm), 2 inches (50 mm), 1 1/2 inches (40 mm)**

		Temperature range (°C) *1 *4				
		Regular type	High-temp. models	High-temp. Vacuum models	High-temp. High Vacuum models	Oxygen and Chlorine models
Wetted parts section	Normal operating range	-40 to +180	-5 to +280 *5	-5 to +280 *5	10 to 300 *5	-10 to +120
	Operative limit range	-50 to +185	-10 to +310 *6	-10 to +310 *6	-10 to +310 *6	-40 to +125
Ambient temperature *2 Flange size: Flush diaphragm type 3 inches (80 mm) Extended diaphragm type 4 inches (100 mm)	Normal operating range	-30 to +75	-5 to +55	-5 to +55	10 to 55	-10 to +75
	Operative limit range	-50 to +80	-10 to +60	-10 to +60	-10 to +60	-40 to +80
Ambient temperature *2 Flange size: Flush diaphragm type 2 inches (50 mm)/ 1.5 inch (40 mm) Extended diaphragm type 3 inches (80 mm)/ 2 inches (50 mm)	Normal operating range	-15 to +65	-5 to +45	-5 to +55	10 to 55	-10 to +75
	Operative limit range	-30 to +80	-10 to +55	-10 to +60	-10 to +60	-40 to +80
Specific gravity of fill liquid *3		0.935	1.07	1.07	1.09	1.87

Note) \*1. See the working pressures and temperatures of the wetted parts section in Figure 1, Figure 2 and Figure 3.

\*2. Ambient temperatures of the transmitter itself

\*3. Approximate values at the temperature of 25 °C

\*4. Note that if the operating temperature falls below the lower limit of the normal operating range, the response of the transmitter becomes slower.

\*5. When the wetted parts material is tantalum, the upper limit is 180 °C.

\*6. When the wetted parts material is tantalum, the upper limit is 200 °C.

**Table 2. Ambient temperature limits/Temperature ranges of wetted parts: Flange size: 3/4 inches (20 mm), 1/2 inches (15 mm)**

		Temperature range (°C) *1 *4			
		Regular type	High-temp. models	Oxygen and chlorine models	Fast response models
Wetted parts section	Normal operating range	-40 to +180	-5 to +280	-10 to +120	-40 to +120
	Operative limit range	-50 to +185	-10 to +310	-40 to +125	-50 to +125
Ambient temperature *2 Normal operating range	-15 to +65	-5 to +45	-10 to +75	-15 to +65	-30 to +80
	-30 to +80	-10 to +55	-40 to +80	-40 to +80	-30 to +80
Specific gravity of fill liquid *3		0.935	1.07	1.87	0.873

Note) \*1. See the working pressures and temperatures of the wetted parts section in Figure 1, Figure 2, and Figure 3.

\*2. Ambient temperatures of the transmitter itself.

\*3. Approximate values at the temperature of 25 °C.

\*4. Note that if the operating temperature falls below the lower limit of the normal operating range, the response of the transmitter becomes slower.

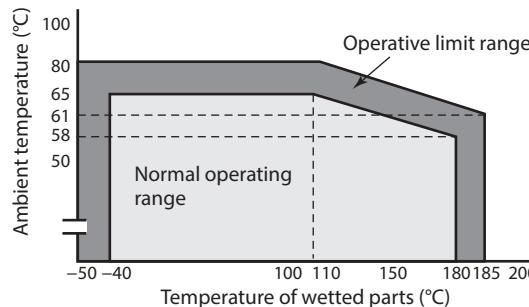

**For Explosion proof models with digital indicators, which have to be used within the following ranges**

**Normal operating condition**

-20 to +70 °C

**Operative limit**

-30 to +80 °C

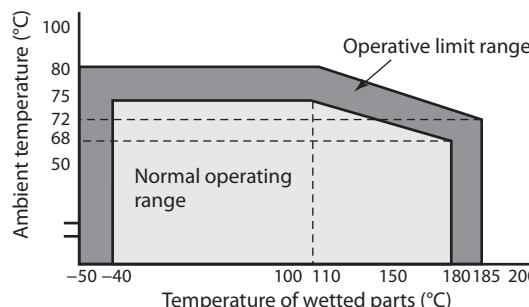

**Figure 5. Ambient temperature and temperature of wetted parts section (for general purpose models)**

Flange diameter:

Flush diaphragm 2 inches (50 mm)/1 1/2 inch (40 mm)  
Extended diaphragm 3 inches (80 mm)/2 inches (50 mm)

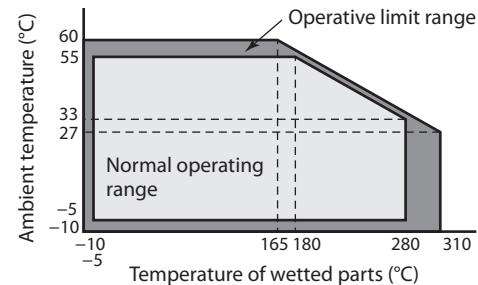

*Note) When the fill liquid is for general purposes, make sure before using your transmitter that the conditions in both Figure 1, Figure 5 and Figure 6 are met.*

**Figure 6. Ambient temperature and temperature of wetted parts section (for general purpose models)**

Flange diameter:

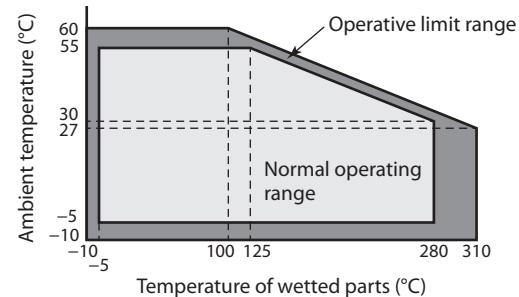

Flush diaphragm 3 inches (80 mm)  
Extended diaphragm 4 inches (100 mm)

**Figure 10. Ambient temperature and temperature of wetted parts section (for high temperature and high vacuum 4, 5 m)**

Flange diameter:

Flush diaphragm 2 inches (50 mm)/1 1/2 inch (40 mm)

**Ambient humidity limits**

5 to 100 % RH

**Stability against supply voltage change**

±0.005 % FS/V

**Response time [★]**

Approx. 700 ms (ref. value, with 5 m of ordinary capillaries, at room temp.)

**Damping time [★]**

Selectable from 0 to 128 sec. (HART)

Selectable from 0 to 32 sec. in ten stages (SFN)

**Zero Stability**

±0.5 % of URL per 10 year

**Lightning protection [★]**

Applicable Standards: IEC 61000-4-5

Peak value of current surge (80/20 µ sec.): 6000 A

**Indicator**

The digital LCD indicator (optional) shows the output in percentage or in engineering units. Range for engineering unit is from -99999 to 99999 when set at the factory, and from -19999 to 19999 when using the communicator. Specify the following items when placing order with engineering units,

- Pressure range
- Engineering unit of pressure
- Method of display, either linear or square-root.

These data may be set or changed using the communicator.

**OPTIONAL SPECIFICATIONS****FEP protective film**

Use FEP protective films when corrosive fluids are used or to inhibition migration from metal diaphragms.

**Working temperature range**

0 to 110 °C

**Working pressure range**

Atmospheric pressure to flange rating (up to JIS10K, ANSI/JPI 150) (Not usable under negative pressure)

**Oil free finish**

The transmitter is shipped with oil-free wetted parts.

**External zero/span adjustment function**

The transmitter can be easily adjusted to zero or span in the field.

Indicator must be selected to enable this option.  
Fieldbus type does not have span adjustment.

**Elbow**

This is an adaptor for changing the electrical conduit connection port from the horizontal to the vertical direction, if required by wiring conditions in the field. One or two elbows may be used as needed.

**Conformance to SI units**

We deliver transmitters set to any SI units as specified.

**Safety Transmitter**

Select this option to be used as a component of Safety Instrument System (SIS).

AT9000 is complied with IEC61508, certified according to Safety Integrity Level 2 (SIL-2)

This option is not applicable for FOUNDATION Fieldbus type, DE communication type, external zero/span adjustment (option A2), and Alarm output (option Q7).

**Alarm Output (contact output)**

Contact output is prepared as alarm output when alarm (Output Alarm/Sensor Temp. Alarm) condition is detected. It can be set to or Normally Close.

Contact output type : One open collector (NPN)

Contact rating: 30 V DC max., 30 mA DC max.

Residual voltage at output ON: 3.0 V max.

Operating mode: Normally Open (default)

Normally Close is not recommended.

When this option is selected, CHECK terminals for current check cannot be used.

This option is not applicable for FOUNDATION Fieldbus type, and with intrinsic safety, Type n, Nonincendive types.

**Advanced diagnostics [★]**

This option is applicable for FOUNDATION Fieldbus type. Refer to SS2-GTX00Z-0100.

**Custom calibration**

Calibrate for the specified pressure range at the factory.

## PHYSICAL SPECIFICATIONS

### Materials

#### Fill fluid

Silicone oil for general purpose and high-temperature vacuum models

Fluorine oil for oxygen and chlorine models

For specific gravity, refer to Table 1 on page 4.

#### Center body

316 SST

#### Transmitter case

Aluminum alloy, CF8M (Equivalent to 316 SST)

#### Meter body cover

SCS14A (Equivalent to 316 SST)

#### Bolts and nuts (for fastening meter body cover)

Carbon steel (SNB7), 304 SST, 630 SST

#### O-ring

NBR

#### For wetted parts

SCS14A (316L SST for diaphragm only)

ASTM B575 (Hastelloy C-276 equivalent), Tantalum, 316L SST

#### Flange materials

304 SST, 316 SST, 316L SST

#### Mounting Bracket

##### Bracket

304 SST

##### U-bolt and nuts

304 SST

#### Paint

Standard: Baked acrylic paint

Corrosion-proof: Baked urethane paint

#### Color

Housing: Silver N-8.2

Cap: azbil bordeaux 2.5R 2.25/5

### Capillary section

#### Capillary tube length

2, 3, 4, 5, 6, 7, 8, 9 and 10 m

2, 3, 4 and 5 m when flange diameter is flush diaphragm

2 inches (50 mm)/1 1/2 inch (40 mm)

3/4 inches (20 mm), 1/2 inches (15 mm)

extended diaphragm

3 inches (80 mm)/2 inches (50 mm)

#### Capillary tube material

316 SST

#### Armored tube material

304 SST

#### Coating (optional)

Olefin coating to improve corrosion resistance

(Not applicable for high-temperature/Vacuum service type and High-temperature/High-vacuum service type.)

### Weight

Approx. 20.0 kg (Including ANSI 150# - 3 inches flange and capillary 5 m long)

## INSTALLATION

### Electrical connection

1/2 NPT internal thread, M20 internal thread.

### Grounding

Resistance 100 Ω max.

### Mounting

Direct mounting on the process side

Using 2-inch pipe mounting brackets: Mount the transmitter on a horizontal or vertical 2-inch pipe.

### Process connection

Flange (both higher and lower pressure sides)

#### Flush diaphragm

JIS 10K, 20K, 30K and 63K: 40, 50, 80 mm(RF) equivalents

ANSI/JPI 150, 300 and 600: 1 1/2, 2, 3 inches (RF) equivalents

ANSI/JPI 150 and 300: 1/2, 3/4 inches (RF) equivalents

#### Extended diaphragm

JIS 10K, 20K and 30K: 50, 80, 100 mm(RF) equivalents

ANSI/JPI 150, 300 and 600: 2, 3 inches (RF) equivalents

ANSI/JPI 150 and 300: 4 inches (RF) equivalents

#### Flange standard

JIS; JIS B 2220 (2004)

ANSI; ANSI B 16.5 (1988)

JPI; JPI-7S-15-93

## TRANSMITTER HANDLING NOTES

To get the most from the performance this transmitter can offer, please use it properly noting the points mentioned below. Before using it, please read the Instruction Manual.

### Transmitter installation notes

#### WARNING

- When installing the transmitter, ensure that gaskets do not protrude from connecting points into the process (such as adapter flange connection points and connecting pipes and flanges). Failure to do so may cause a leak of process fluid, resulting in harm from burns, etc. In addition, if the process fluid contains toxic substances, take safety measures such as wearing goggles and a mask to prevent contact with the skin and eyes and to prevent inhalation.
- Use the transmitter within the operating ranges stated in the specifications (for explosion-proofing, pressure rating, temperature, humidity, voltage, vibration, shock, mounting direction, atmosphere, etc.). Using the transmitter outside the operating conditions may cause device failure or fire, resulting in a harmful physical risk of burning or the like.
- When performing wiring work in explosion-proof areas, follow the work method specified in the explosion-proof guidelines.

#### CAUTION

- After installation, do not use the transmitter as a foothold or put your weight on it. Doing so may cause damage.
- Be careful not to hit the glass indicator with tools etc. This could break the glass and cause injury.
- The transmitter is heavy. Wear safety shoes and take care when installing it.
- Impact to transmitter can damage sensor module.

### Wiring notes

#### WARNING

- To avoid shocks, do not perform electrical wiring work with wet hands or with live wires.

#### CAUTION

- Do wiring work properly in conformance with the specifications. Wiring mistakes may result in malfunction or irreparable damage to the instrument.
- Use a power supply that conforms to the specifications. Use of an improper power supply may result in malfunction or irreparable damage to the instrument.
- Use a power supply with overcurrent protection for this instrument.

## Handling precautions for HART specification devices

- If you need to operate with a secondary host (HART communicator, etc.), set the communication interval of the primary host (DCS, device management system) to 8 seconds or more, or suspend communication from the primary host. If the primary host repeats HART communication within 8 seconds, the request from the secondary host may not be received (communication may not be possible).
- If electrical noise in the environment prevents HART communications with the host, take countermeasures such as separating the signal cables from the source of the noise, improving the grounding, changing to shielded signal cables, etc. Even if noise interferes with HART communications, the 4–20 mA analog signal will be unaffected and can be used for control.
- If this product is being operated in multidrop mode, there is a limit to the number of devices that can be used. If you are using multidrop mode, please consult with us.

## To use the remote seal type transmitter correctly

A various accuracy regulation and notes of the remote seal type transmitter are as follows.

### A. Standard accuracy

Linearity in constant ambient temperature and constant static pressure is shown.  
(Refer to "PERFORMANCE SPECIFICATIONS" on page 11)

### B. Ambient temperature characteristics

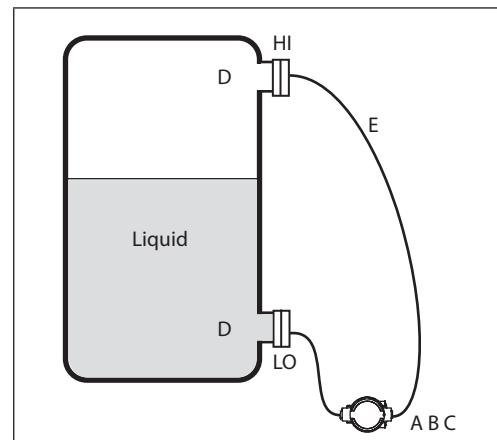

Accuracy by the ambient temperature change in the main body under constant static pressure is shown. (Refer to "PERFORMANCE SPECIFICATIONS" on page 11)

### C. Static pressure characteristics

Accuracy by the static pressure change under constant ambient temperature is shown.  
(Refer to "PERFORMANCE SPECIFICATIONS" on page 11)

### D. Wetted parts temperature characteristics

Zero shift is shown, when the temperature fluctuate of process wetted parts of an upper flange and lower flange changes.

Flange type	3 inches flush diaphragm flange 4 inches Extended diaphragm flange	2 inches flush diaphragm flange 3 inches Extended diaphragm flange	1 1/2 inch flush diaphragm flange 2 inches extended diaphragm flange 1/2 inch flush diaphragm flange
Wetted parts temperature characteristics (total shift of setting ranges)	$\pm \left\{ \left( 600 + \frac{2L}{50} \right) \times \frac{1}{55} \times \frac{\Delta T}{1000x} \right\} \%$	$\pm \left\{ \left( 5 + 0.008L \right) \times \frac{\Delta T}{200x} \right\} \%$	$\pm \left\{ \left( 5 + 0.008L \right) \times \frac{\Delta T}{100x} \right\} \%$

x: Shown for each item are the percentage ratio for x (kPa), which is the greatest value of either the upper range value (URV)\*1, the lower range value (LRV)\*2 or the span.

L: Flange length (mm) (In case, standard flange; L=0 mm)

$\Delta T$ : Temperature difference between upper flange and lower flange.

### E. Temperature characteristics of capillary tube

An integrated shift is shown, when temperatures difference is generated between the upper flange side capillary tube and the lower range capillary tube by the influence of the radiant heat and the sun light in the process.

Note) Take into account the shift when the transmitter is in the following conditions.

- One side of the capillary tube is in the sun and the other side of the capillary tube is in the shade.
- Radiant heat in the process hits one side of the capillary tube.

When a temperature difference is large between the upper flange side capillary tube and the lower flange side capillary tube, take the following typical measures against the differences.

- Arrangement of the capillary tubes
- Use of moistunizing material
- Use of shielding plates against the radiant heat

Flange type	3 inches flush diaphragm flange 4 inches Extended diaphragm flange	2 inches flush diaphragm flange 3 inches Extended diaphragm flange	1 1/2 inch flush diaphragm flange 2 inches extended diaphragm flange
Fill fluid	Regular/High temp./ High-temp. and vacuum/High-temp. and high-vacuum		
Temperature characteristics of capillary (total shift of setting ranges)	$\pm \left( 1.6 \times \frac{\Delta l \times \Delta T}{x} \right) \%$	$\pm \left( 3.0 \times \frac{\Delta l \times \Delta T}{x} \right) \%$	$\pm \left( 7.1 \times \frac{\Delta l \times \Delta T}{x} \right) \%$

Flange type	1/2 inch and 3/4 inch flush diaphragm flanges		
Flange selection	1, 3	5	6
Fill fluid	Regular/High temp.		
Temperature characteristics of capillary (total shift of setting ranges)	$\pm \left( 7.1 \times \frac{\Delta l \times \Delta T}{x} \right) \%$	$\pm \left( 1.2 \times \frac{\Delta l \times \Delta T}{x} \right) \%$	$\pm \left( 0.7 \times \frac{\Delta l \times \Delta T}{x} \right) \%$

x: Shown for each item are the percentage ratio for x (kPa), which is the greatest value of either the upper range value (URV)\*1, the lower range value (LRV)\*2 or the span.

L: Length of capillary tube with temperature difference.

$\Delta T$ : Temperature difference between upper flange and lower flange.

Note) \*1. URV denotes the process value for 100 % (20 mA DC) output.

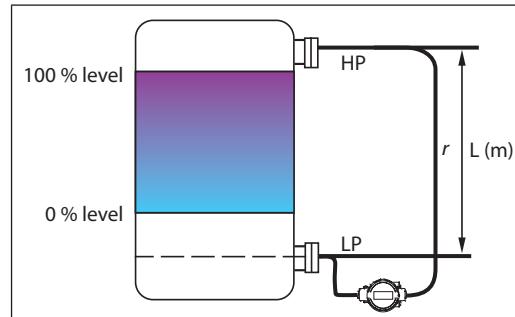

\*2. LRV denotes the process value for 0 % (4 mA DC) output.

## F. Temperature correction function of capillary part.

The change in the density ( $\rho$ ) of fill fluid is operated. As a result, the output correction is done.

[Setting method]

The height (L) between flanges of the tank is set. Please specify it when you understand height beforehand. It is not possible to set it before shipping when height is not specified. Please apply the minus to the setting of height (L) when you set up a high pressure side under the tank.

## G. Installation position of Remote-sealed differential pressure transmitters.

Azbil Corporation is recommended to set up the main body of the transmitter from a lower flange downward when the transmitter is set up to the sealed tank. Please meet the following requirements when it is necessary to set up the transmitter by all means in the middle of the tank.

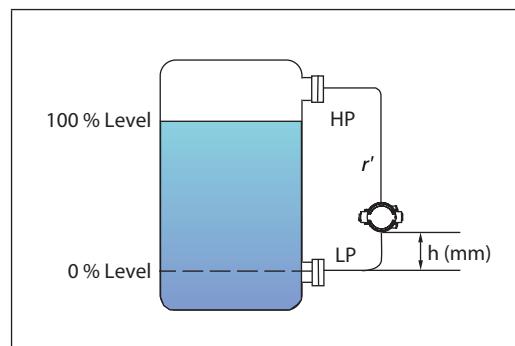

$$Po + ((-\rho' h)/102) \geq P \quad (1 \text{ kpa} = 102 \text{ mmH}_2\text{O}) \\ \therefore (h \leq (Po - P)(102/\rho'))$$

$P$ : Permissible pressure lower bound value of the transmitter (kPa abs.)

$\rho'$ : Fill fluid gravity of the transmitter

$Po$ : Pressure in tank (kPa abs.)

$h$ : Distance from a lower flange (mm)

	Fill fluid gravity $\rho'$	Permissible pressure lower bound value P (kPa abs.)	Temperature range of wetted parts (°C)
Regular service	0.935	2	-40 to +40
High temp.	1.07	2	-5 to +90
High-temp. and vacuum	1.07	0.1333	-5 to +100
High-temp and high-vacuum	1.09	0.1333	10 to 250
Oxygen, Chlorine	1.87	54	-10 to +40

## PERFORMANCE SPECIFICATIONS

### Max working pressure

- Note) 1. Max. working pressure depends on flange rating, flange materials and operating temperature. Please refer to the following data.  
 Operating range of temperature depends on specification of transmitters.
2. Max. working pressure depends on the smaller value of either 1.5 MPa or following data.
  3. Max. working pressure depends on the smaller value of either 10 MPa or following data.

**Reference accuracy**

Shown for each item are the percentage ratio for  $x$  (kPa), which is the greatest value of either the upper range value (URV)<sup>\*1</sup>, the lower range value (LRV)<sup>\*2</sup> or the span.

**Model GTX35R (for regular type/high-temperature service/oxygen service)**

Material of wetted parts: 316 SST, 316L SST

Flange size: Flush diaphragm 3 inches (80 mm) Extended diaphragm 4 inches (100 mm)

Reference accuracy *4		$\pm 0.2\%$	(For $x \geq 12.5$ kPa (1250 mmH <sub>2</sub> O))
		$\pm (0.05+0.15 \times \frac{12.5}{x})\%$	(For $x < 12.5$ kPa (1250 mmH <sub>2</sub> O))
Ambient Temperature effect (Shift from the set range) Change of 30 °C (Range from -5 to +55 °C)	Combined shift	$\pm 0.71\%$	(For $x \geq 25$ kPa (2500 mmH <sub>2</sub> O))
Static pressure effect (Shift from the set range) Change of 7 MPa (70 kgf/cm <sup>2</sup> )	Zero shift	$\pm (0.03+0.72 \times \frac{25}{x})\%$	$x$ : kPa
	Combined shift	$\pm 1.00\%$	(For $x \geq 25$ kPa (2500 mmH <sub>2</sub> O))
		$\pm (0.03+0.97 \times \frac{25}{x})\%$	(For $x < 25$ kPa (2500 mmH <sub>2</sub> O))

**Model GTX40R (for regular type/high-temperature service/oxygen service)**

Material of wetted parts: 316 SST, 316L SST

Flange size: Flush diaphragm 3 inches (80 mm) Extended diaphragm 4 inches (100 mm)

Reference accuracy *3 *4		$\pm 0.2\%$	(For $x \geq 210$ kPa (2.1 kgf/cm <sup>2</sup> ))
		$\pm (0.05+0.15 \times \frac{210}{x})\%$	(For $x < 210$ kPa (2.1 kgf/cm <sup>2</sup> ))

## MODEL SELECTION

**Model GTX35R (Remote-sealed type for standard differential pressure)**

**Model GTX40R (Remote-sealed type for high differential pressure)**

**Flush 3 inches flange type for regular/high temperature/oxygen/chlorine service**

Model No.: GTX\_ \_R - Selection I (I II III IV V VI VII VIII IX) - Selection II (I II III IV V VI) - Option

### Basic Model No.

	Measuring span	2.5 to 100 kPa (250 to 10,160 mmH <sub>2</sub> O)	GTX35R	Flush flange type 3 inches (80 mm)
		35 to 700 kPa (0.35 to 7 kgf/cm <sup>2</sup> )	GTX40R	

### Selection I

I	Output	4 to 20 mA (SFN Communication)	A
		4 to 20 mA (HART5 Communication)	B
		FOUNDATION Fieldbus communication	C
		Digital output (DE communication) *3	D
		4 to 20 mA (HART7 Communication)	F
II	Fill fluid	Regular type (Silicone oil)	A
		For high temperature service (Silicone oil)	B
		For oxygen service (Fluorine oil)	H
		For chlorine service (Fluorine oil) *2	J
III	Wetted parts material	316 SST (Diaphragm: 316L SST)	A
		ASTM B575 (Equivalent to Hastelloy C-276)	B
		Tantalum *1	C
		316L SST	D
IV	Flange rating	ANSI150	A1
		ANSI300	A2
		ANSI600	A3
		JIS10K	J1
		JIS20K	J3
		JIS30K	J4
		JIS63K	J6
		JPI150	P1
		JPI300	P2
		JPI600	P3
V	Flange size	3 in./80 A	F
VI	Flange type	Flush type	A
VII	Flange material/bolt and nut material	Flange	Bolt and nut
		304 SST	304 SST
		304 SST	630 SST
		304 SST	Carbon steel
		316 SST	304 SST
		316 SST	630 SST
		316 SST	Carbon steel
		316L SST	304 SST
		316L SST	630 SST
		316L SST	Carbon steel
VIII	Gasket face finish	None, Standard JISRa3.2 (12.5S)	A
IX	Capillary length	2 m	02
		3 m	03
		4 m	04
		5 m	05
		6 m	06
		7 m	07
		8 m	08
		9 m	09
		10 m	10
		2 m (with Olefin Cover)	A2
		3 m (with Olefin Cover)	A3
		4 m (with Olefin Cover)	A4
		5 m (with Olefin Cover)	A5
		6 m (with Olefin Cover)	A6
		7 m (with Olefin Cover)	A7
		8 m (with Olefin Cover)	A8
		9 m (with Olefin Cover)	A9
		10 m (with Olefin Cover)	A0

\*1. In case "Tantalum" is used for diaphragm material and in case of "For high-temperature service", normal operating temperature of wetted parts is -10 to +180 deg.C

\*2. In case code J is selected, code C "Tantalum" of Wetted parts material should be selected.

\*3. Not applicable for the combination with code A2 "With external Zero/Span adjustment", Q1 "Safety Transmitter", and Q2 "NAMUR NE43 Compliant Output signal limits" of Option.

**Model GTX35R (Remote-sealed type for standard differential pressure)****Model GTX40R (Remote-sealed type for high differential pressure)**

**Extended 4 inches flange type for regular/high temperature/oxygen/chlorine service**

Model No.: **GTX\_ \_R - Selection I (I II III IV V VI VII VIII IX) - Selection II (I II III IV V VI) - Option**

**Basic Model No.**

	Measuring span	2.5 to 100 kPa (250 to 10,160 mmH <sub>2</sub> O)	GTX35R	Extended flange type 4 inches (100 mm)
		35 to 700 kPa (0.35 to 7 kgf/cm <sup>2</sup> )	GTX40R	

**Selection I**

I	Output	4 to 20 mA (SFN Communication)	A
		4 to 20 mA (HART5 Communication)	B
		FOUNDATION Fieldbus communication	C
		Digital output (DE communication) *2	D
		4 to 20 mA (HART7 Communication)	F
II	Fill fluid	Regular type (Silicone oil)	A
		For high temperature service (Silicone oil) *1	B
		For oxygen service (Fluorine oil)	H
III	Wetted parts material	316 SST (Diaphragm: 316L SST)	A
		316L SST *3 *4	D

\*1. In case "Tantalum" is used for diaphragm material and in case of "For high-temperature service", normal operating temperature of wetted parts is -10 to +180 deg.C.

\*2. In case: Basic Model is GTX35R, and Tantalum is used for diaphragm material and Flange size is "Flush Diaphragm 1 1/2 in./40 mm", minimum Span will be 10 kPa.

\*3. Specifications for Capillary Length 4 m and 5 m are as follows:

a. Temperature effect and Static pressure effect will be 1.5 times of those of High-temperature service.

b. Ambient temperature range for Regular service: -10 to +55 deg.C, Temperature of wetted parts: -30 to +110 deg.C.

c. Ambient temperature range for Oxygen service: -10 to +55 deg.C, Temperature of wetted parts: -10 to +110 deg.C.

d. In the case, Ambient temperature is 40 deg.C, the highest wetted parts temperature for High-temp service (4 m) will be 280 deg.C.

e. In the case, Ambient temperature is 38 deg.C, the highest wetted parts temperature for High-temp service (5 m) will be 280 deg.C.

\*4. In case code J is selected, code C "Tantalum" of Wetted parts material should be selected.

\*5. Not applicable for the combination with code A2 "With external Zero/Span adjustment", Q1 "Safety Transmitter", and Q2 "NAMUR NE43 Compliant Output signal limits" of Option.

		NEPSI Type n	N5
		KOSHA Flameproof *5	K1
III	Built-in indicating smart meter	None	X
		With indicator	A
IV	Paint *7	Standard	X
		None (316 stainless steel housing)	E
		Corrosion-proof (Urethane)	H
V	Failure alarm	UP Scale	A
		DOWN scale	B
		None (for FOUNDATION Fieldbus) *8	X
VI	Mounting Bracket	None	X
		304 SST (Flat Form)	6
		Direct mounting kit *9	D

\*3. Not applicable for the combination with code F1, F6 of Explosion proof.

\*4. For FOUNDATION Fieldbus type. Refer to SS2-GTX00Z-0100.

\*5. Not applicable for the combination with code E of Paint.

\*6. In case the code C "FOUNDATION Fieldbus communication" of output is selected, code A2 of Option code should be selected.

\*7. In case code X or D is selected, the material of transmitter case is aluminum alloy.

\*8. In case this code is selected, code C of Output should be selected.

\*9. Not applicable for the combination with B, C, or D of Fill Fluid.

Model No.: **GTX\_ \_R** - Selection I (I II III IV V VI VII VIII IX) - Selection II (I II III IV V VI) - Option**Option**

\*1. No need to select when Fill Fluid code H, or J is selected.

\*2. Not applicable for the combination with code A2, or Q7 of Option.

\*3. Not applicable for the combination with code A, or B of Process installation.

\*4. Not applicable for the combination with code F1, F6 of Explosion proof.

\*5. Not applicable for any Explosion proof. Please select code XX "None" of Explosion proof.

\*6. Applicable for "ASTM B575", code B of Material (center body).

\*7. Not applicable for the combination with code B "M20, Watertight" electrical connection.

\*8. Not applicable for the combination with code X "None" of Indicator. Please select "With indicator".

\*9. Not applicable for the combination with code D "Digital output (DE communication)" and F "4 to 20 mA (HART7 Communication)" of output.

\*10. Not applicable for the combination with code F2, F5, F6, N2, N5, E2, and A2 of Explosion proof.

\*11. In case code P8 is selected, code D of Bolt/nut should be selected.

\*12. In case code P8 is selected, code E of Paint should be selected.

\*13. In case code P8 is selected, code X or 2 of Mounting bracket should be selected.

\*14. Not applicable for the combination with code C "Digital output (FOUNDATION Fieldbus communication)" of output.

\*15. Not applicable for the combination with code A "4 to 20 mA (SFN Communication)", B "4 to 20 mA (HART5 Communication)", and D "Digital output (DE communication)" of output.

\*1. When this option is selected, the same option for transmitter must be selected.

\*2. 630 SST Bolt/nut material should be selected.

\*3. Refer to the specification sheet for the working pressure range.

\*4. The combination with Model: SDR is not available.

\*5. Select this code when flange type code "1" is selected in the transmitter selection.

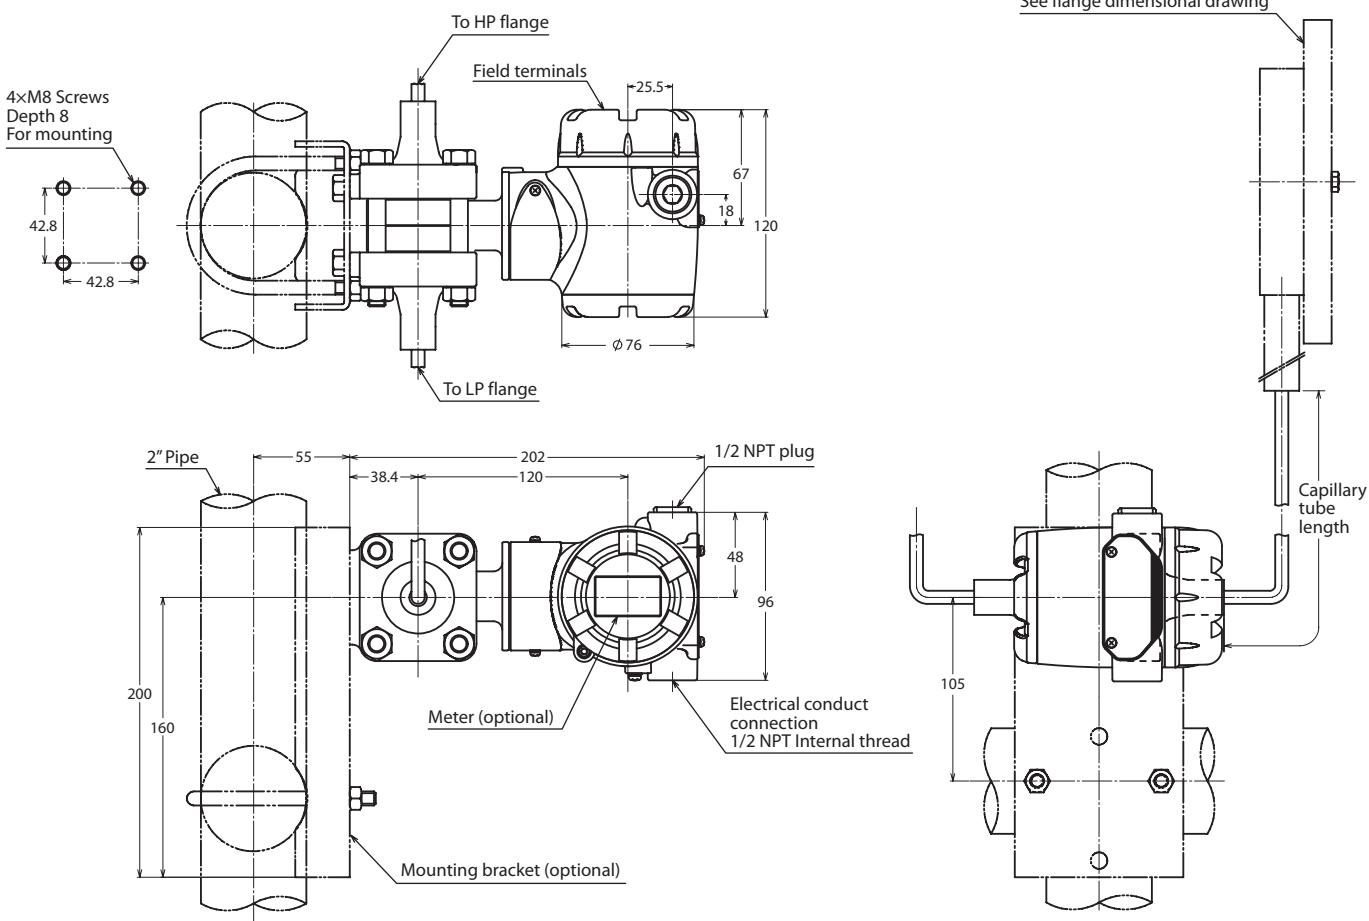

\*6. Select this code when flange type code "5" or "6" is selected in the transmitter selection.

\*7. 304 SST Bolt/nut material should be selected.

## DIMENSION

### Model GTX35R/GTX40R

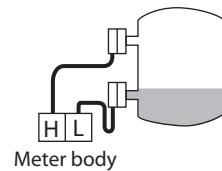

Unit: mm

Note) 1. To prevent vibration, you are recommended to fasten the capillary tube mid-length.

2. Select a gasket that will not contact the diaphragm after it is tightened.

3. When the suppression in larger than one half of the measuring span, the higher pressure side and the lower pressure side of the process connection end flange are opposite to those shown in the figure above. When using the transmitter to measure liquid levels, connect at H and L marks on the meter body as shown in the right figure.

## TERMINAL CONNECTION

(Not applicable for Fieldbus. See SS2-GTX00Z-0100 for Fieldbus.)

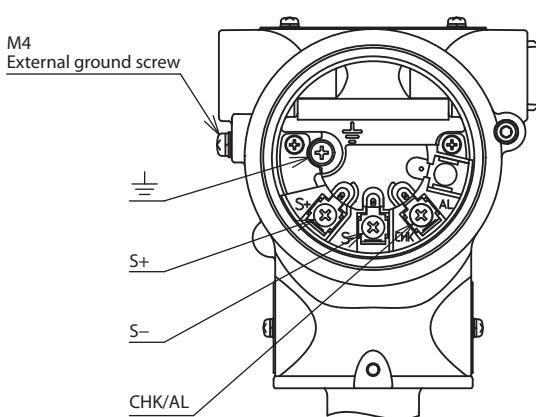

Table 1: Terminal connection
