- Servo-piston with forced lifting
- Switches without differential pressure
- Temperatures up to + 180°C
- For neutral media, incl. steam
- Push-over coil system

The Type 0407 is a pilot controlled solenoid valve with servo-piston and forced valve lifting, and is suitable for media temperatures up to +180°C. The valve opens without differential pressure from zero bar, and is closed by its own media pressure and spring force without power supply.
